# ICPerMed

## International Consortium on Personalise Medicine

Aim: To coordinate and foster research to develop and evaluate personalised medicine approaches

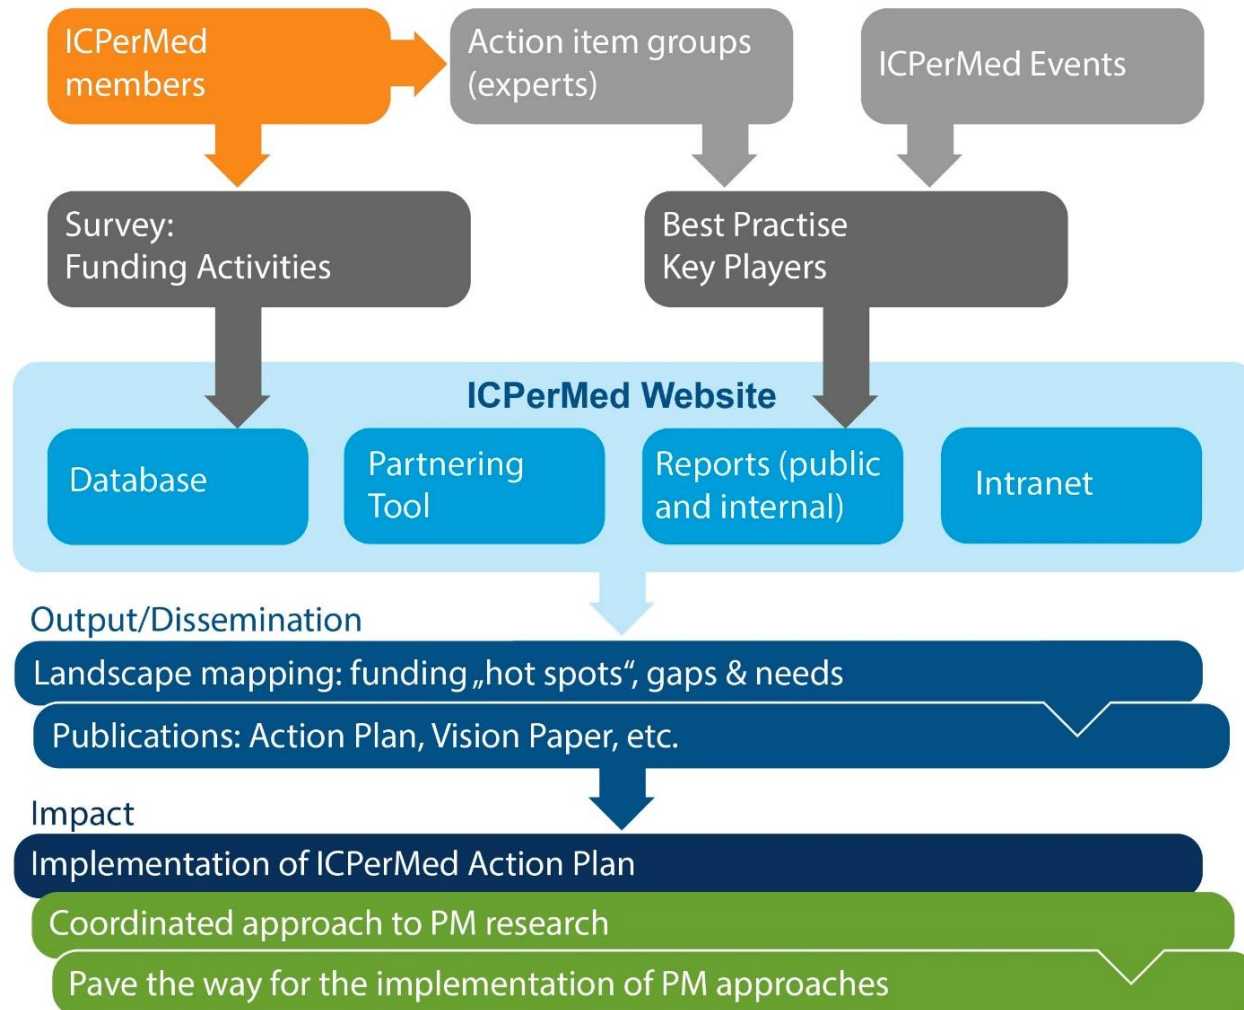

- International consortium model
- Launched in 2016, now more than 40 European and international partners
- Members and observers are **public and private not-for-profit health research funding organisations**, representing ministries, funding agencies and the European Commission (EC)
- Advancement of the biomedical, social, and economic sciences, together with technological development, is the driving force for PM. **Strong investment in research and innovation** is therefore a prerequisite for its successful implementation.

# ICPerMed Vision Statement

## Research as driver of personalised medicine

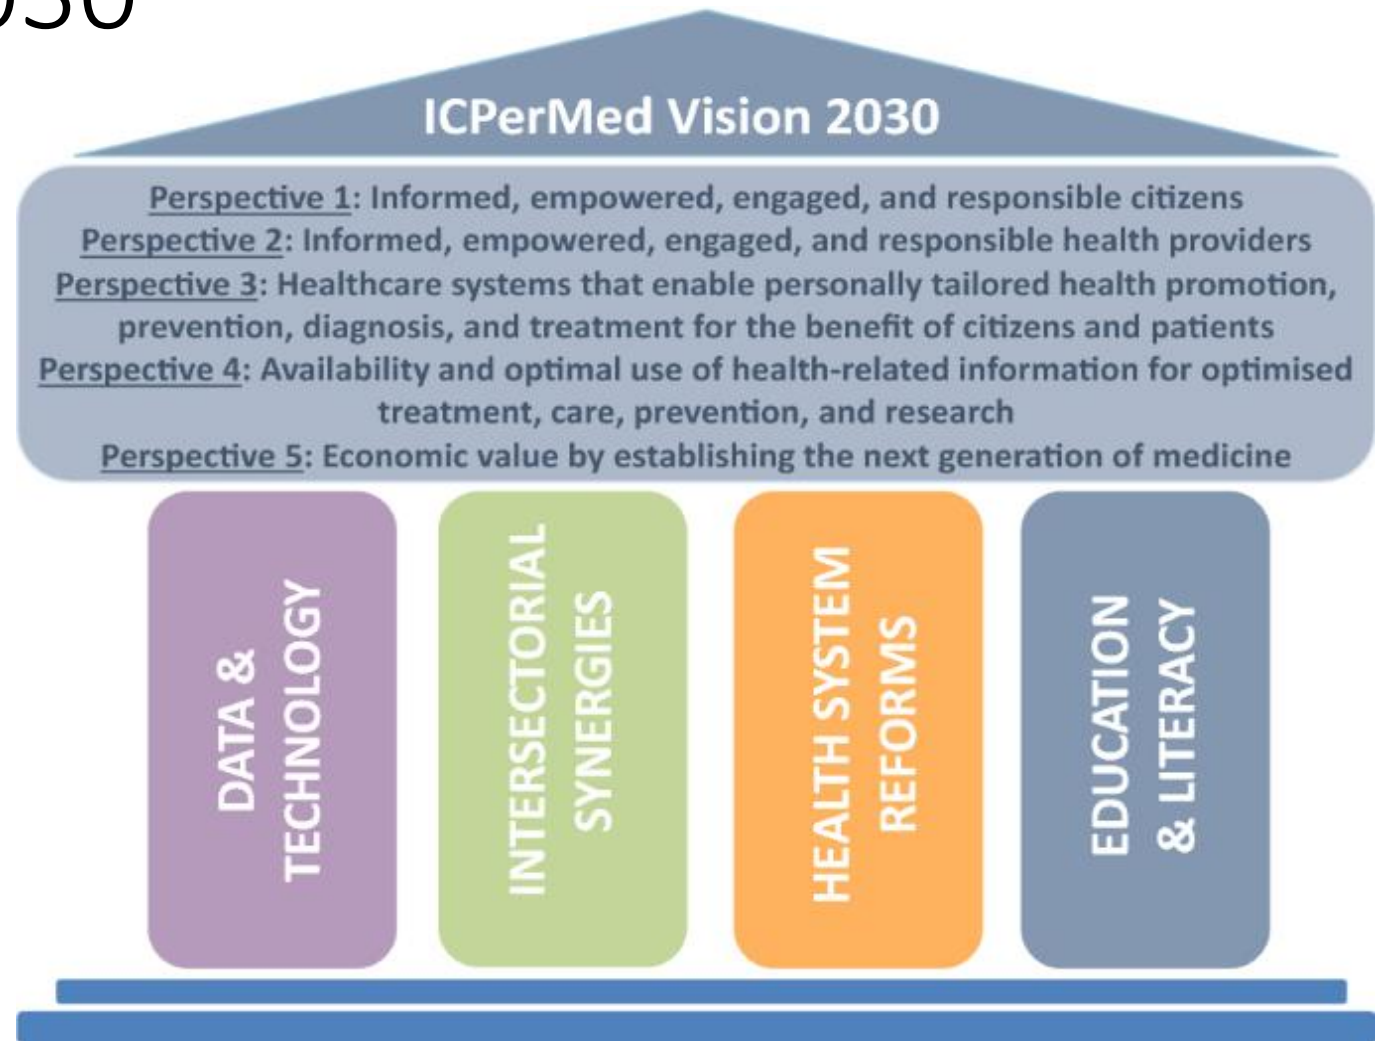

- Support the **personalised medicine science base** through a coordinated approach to **research**.
- Support research to investigate **the benefits** of personalised medicine to **citizens** and **healthcare systems**.
- Pave the way for personalised medicine approaches for **citizens**
- Establish **ICPerMed members as global leaders** in personalised medicine research.

# ICPerMed – Coordinating PM research

# ICPerMed Vision 2030

“How can personalised approaches pave the way to next-generation medicine?”

<https://www.icpermed.eu/en/activities-vision-paper.php>

# "Best Practice in Personalised Medicine" Recognition

Recognise, encourage, promote and disseminate outstanding examples of best practices in personalised medicine. Open calls annually **worldwide**.

1. Successful translation of personalised medicine research into an added value for the patient.
2. Policy making and impact analysis for personalised medicine research.

Scientific papers, Training programmes, interdisciplinary collaboration

## Examples:
